

## **ENTERPRISE SECURITY ANALYST**

Bishop Fox is a leading security consulting firm serving the Fortune 1000 and high-tech startups. We protect our clients by finding vulnerabilities and building defenses before the attackers can break bad. From critical infrastructure to credit cards; social media to mobile games; flight navigation systems to frozen waffle factories — we're right there, helping design better defenses.

We're looking for talented security analysts to help us secure some of the world's most complex software and sophisticated technologies.

## Who You Are and What You'll Do

You're not afraid of regulations. You gather and examine data for fun. You can efficiently configure technology to implement and enforce security policies and controls. You can easily assess information and systems and develop logical conclusions. You have a thorough understanding of common security operations concepts and procedures.

In this role, you will be intimately acquainted with how security affects all layers of systems, networks, computer platforms, operating systems, Internet services, applications, and databases — and operationally support all of these elements.

With Bishop Fox, your responsibilities would include reviewing server configurations, logging and monitoring tools, and firewalls for effectiveness. You would document security procedures and identify process improvements for security operations teams. You would create and monitor clients' security infrastructure.

As a consultant, you'll solve challenging technical problems and build creative solutions. As a trusted advisor, you'll provide your expert opinion to help our clients navigate difficult business decisions.

## **Why Bishop Fox**

Bishop Fox offers competitive salary, generous benefits, flexible schedules, and negotiable travel. If you're looking for opportunities to grow professionally, this is the place. You'll work alongside some of the most talented and experienced security consultants in the industry.

We have a casual workplace environment, but we're consummate professionals.

## **Your Experience**

The following is a list of additional skills you may have in your repertoire. It's rare anyone has all of these, but if you have one or more, we'd like to speak to you.

Bishop Fox™ Confidential 1

- 2-5 years of experience in IT security analysis concentrating in incident response and event management
- More than one year of consulting experience in a competitive consulting environment, serving a variety of clients across industries
